

***SUGGESTED READINGS FOR THE MALE SEXUAL  
DYSFUNCTION TOPIC***

**Federal Practitioner**(Supplement), August 2000, Vol. 17, No. 85, “Erectile Dysfunction in the Male Veteran” (no author, this was a re-print of a satellite broadcast)

**Patient Care for the Nurse Practitioner**, by Bachmann, Coleman, Driscoll and Renshaw, April 1999, Vol. 2, No 4, “Patients with Sexual Dysfunction”, pg. 14 -25

**Federal Practitioner**, by Beaudreau, Litz and Kaufman, August 2000, Vol. 17, No 8, “ Assessing Male Sexual Dysfunction in the VHA”, pg. 11- 18

**Advance for the Nurse Practitioner**, April, 1999, Vol. 7, No 4

(scan the whole journal, particularly the BPH and Sexual Dysfunction articles: it’s dedicated to Men’s Health Issues)

**The Nurse Practitioner Journal**, June, 2000  
Supplement to the June 2000 issue  
Review entire issue since it is dedicated to ED

\*\*\*\*\*

**AJN**, June, 1999, Warner, Rowe and Whipple, Vol. 99, No 6, “Shedding Light on Sexual History”, pg. 34 - 41 (although this is not a NP journal, I think this article could be helpful)

If you can read a couple of these articles, I think you may find them helpful. None are difficult to read. They are not listed in any order of preference.

Thank you
